

**"WHERE FITNESS MEETS
SUSTAINABILITY"**

REGREENITY:

EMPOWERING SUSTAINABILITY THROUGH
SPORTS & COMMUNITY ACTION

THE PROBLEM

The Environmental Challenge:

- 12 million tons of e-waste generated globally each year, and only 20% is recycled.
- Urban areas struggle with a lack of green spaces and community-driven sustainability initiatives.
- Many people want to contribute to sustainability but lack opportunities to do so in fun and engaging ways.

THE SOLUTION

Regreenity: A Global Movement for Green Action

- Hybrid events combining sports, fitness, and environmental action (e-waste collection, tree planting).
- Opportunities for virtual and physical participation, making sustainability accessible for everyone.
- Community-driven events in partnership with NGOs, sports clubs, universities, and companies.

THE CALL TO ACTION

Join Us in Making an Impact:

- Empower your community and organization to drive sustainability.
- Become a partner or sponsor to help us grow this movement.
- Together, we can build a greener future—one hike, one tree, one phone at a time.
